

# Bond Update

October 18, 2019

Greetings Fitzgerald Community!

Again, thank you for voting to improve the future of Fitzgerald Public Schools and for our students. With the funds approved in the 2019 Bond Proposal, FPS will be enhancing building security, remodeling learning spaces and updating technology for student and faculty use. All projects are designed to meet the needs of students, faculty, parents and district residents.

Existing Chatterton Projection System

Proposed State-of-the-Art Projection System

One of the first projects to be completed this March will be an upgrade of the Chatterton Planetarium. This includes replacement of the 50 year old projection system. The upgrades will bring state-of-the-art laser projection to the district. The lighting and sound systems will also be replaced to provide more energy efficient operation. The new equipment will enhance and invigorate astronomy, earth science and biology instruction for grade levels across the district.

A building-by-building summary of bond projects can be found on the District's website. To access, go to the Fitzgerald Public Schools website and click on the "2019 Bond" icon on the home page. A breakdown of bond improvements by school is available under "Project List", and periodic progress updates will be posted there as well. Though some projects and purchases will be completed in later years, the design process for several projects is underway with construction to begin the summer of 2020. Please continue to check our website to stay up to date on the design, construction, and completion of bond improvements!
