

Bond Update

Volume 10

Greetings Fitzgerald Community!

Happy New Year; we hope that everyone had a safe and relaxing holiday season. Reflecting back on 2020 and looking forward to the year ahead, we are grateful for your continual support of Fitzgerald Public Schools. Your commitment allows us to continually improve the learning environment and experiences of our students!

The Fitzgerald High School Weight Room Addition is taking shape, with structural steel installation completed in December. The support columns and roofing are in place, and the construction team will begin work on exterior brick veneer and interior floor slabs. The main volume of the addition will house educational space for exercise and weight-lifting; the project also includes a renovated entrance and expanded lobby space for students and visitors attending FHS athletic events.

Improvements at the Neigebaur Admin. Building include exterior façade and roofing repairs as well as new interior partitions.

At the Neigebaur Administration Building, progress continues on interior renovations including building systems coordination and the installation of new interior walls, doors, and frames. On the exterior, restorations including masonry repair and new metal wall panels are nearing completion and will provide an attractive and welcoming entrance to FPS and community visitors. Lastly, we are excited for the final bid package of Bond Series 1, which is scheduled to start construction this spring and will include a variety of projects across the District.

Installation of structural steel columns, roof framing, and decking is complete at the FHS Weight Room Addition.
