

Bond Update

Volume 12

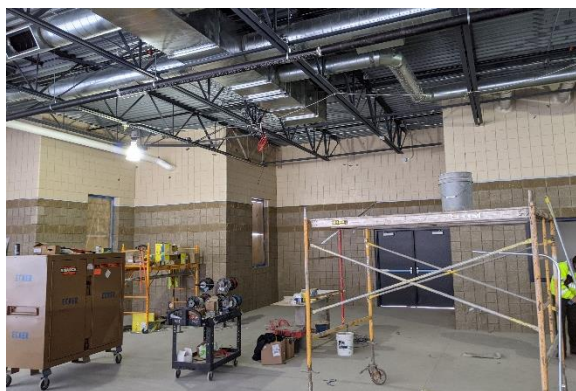

Greetings Fitzgerald Community!

With warmer weather on its way, we are looking forward to the variety of Bond Series 2 projects scheduled to start in the spring. In the meantime, steady progress continues on the Fitzgerald High School Weight Room Addition and the Neigebaur Administration Building. Both buildings are scheduled for completion in the coming months, and we look forward to sharing and utilizing these spaces to better support our students and community.

At the Fitzgerald High School Weight Room Addition, the exterior envelope is nearing completion, with exterior masonry walls and roof decking complete. Window and door installation is underway, with both interior and exterior frames in place and glass installation approaching. At the entrance to the athletic facilities, the glazed window wall will let in natural light and create a welcoming experience for parents and visitors.

Improvements at the Neigebaur Administration Building include new interior finishes and new metal wall panels to match District colors at the building entrance.

Recently completed work at the Weight Room Addition includes rough mechanical and electrical as well as the installation of interior and exterior door and window frames.

Published March 2021

At the Neigebaur Administration Building, work continues on interior renovations. New finishes throughout the board office and administrative spaces include new ceilings, paint, and flooring. On the exterior, restoration continues with the installation of new metal wall panels and an accessible ramp at the building entrance.
