

Bond Update

Volume 13

Happy Spring Fitzgerald Community!

Thank you for your continued support of Fitzgerald Public Schools, our students, and our community. As we transition into a new season, we are excited to also transition from our Bond Series 1 projects approaching completion to our Bond Series 2 projects, which will start design planning in the coming months.

The Fitzgerald High School Weight Room Addition is making steady progress, with new exterior glass recently installed. The large windows at the weight room and athletic entrance will provide the spaces with plentiful natural light and allow views to the exterior vegetation. With the building envelope nearing completion, work is proceeding on the interior with the painting of the roof deck and structural steel. Installation of interior finishes will begin in the coming month.

Improvements at the Neigebaur Administration Building include new interior finishes and new metal wall panels to match District colors at the building entrance.

Recent progress on the Weight Room Addition includes installation of exterior glass and painting of the roof deck and structural steel joists.

At the Neigebaur Administration Building, interior renovation work and exterior improvements are wrapping up. The Board Room is taking shape, with the installation of ceilings, wall finishes, and lighting underway. Outside, new entry circulation and landscaping are in progress and will create a welcoming and accessible entrance for building staff, students, and visitors.
