

Bond Update

Volume 4

Greetings Fitzgerald Community!

As always, thank you for your continual support! We are excited that design is well underway on numerous bond items that will improve the educational experience for our students and enhance safety throughout the district. Bids from contractors have been received and accepted so several construction projects will begin at the end of the school year.

As part of the earliest phase of bond work, directional and monument signage will be installed at every school; all new signage will be of a consistent design to create a unified campus-feel between schools and allow for immediate identification of the school with the district. Directional signage is intended to aid visitors and emergency responders in navigation, using text and arrows to identify the location of key building entrances and components. Monument signs will feature our Fitzgerald colors, Spartan logo, and a large LED panel to display messages and videos. The electric signage can be quickly changed to allow for distribution of emergency information as well as pertinent announcements intended to engage and inform community members.

Existing directional signage at all schools will be updated with a unified design.

Additionally, Fitzgerald High School and Chatterton Middle School will receive new athletic scoreboards, both inside the gymnasiums and outside on the athletic fields. The updated scoreboards will have improved functionality and a state of the art design and will serve a variety of our athletic teams.

New monument signage at all schools will include LED panels capable of distributing messages and information.

Existing athletic scoreboards at Fitzgerald High School and Chatterton Middle School will be replaced.
