

# Bond Update

## Volume 8

Happy Fall Fitzgerald Community!

Thank you for your continual support and commitment to Fitzgerald Public Schools and our students. As the end of the year approaches, we are excited to acknowledge the work accomplished in the past year and look forward to the upcoming work ahead.

At Fitzgerald High School, work on the new Weight Room Addition has continued, with concrete foundations in place and wall construction in progress. The addition will provide expanded educational space for exercise and weight-lifting as well as an expanded lobby space for visitors attending FHS sporting events.

Foundations are in place and wall construction is underway at the new Fitzgerald High School Weight Room Addition.

Progress on the Neigebaur Administration Building Renovations are making steady progress, with improvements on the building exterior and interior construction underway. The newly created offices will help the District better direct its operations and serve Fitzgerald students and the community.

New interior partitions at the Neigebaur building will create a variety of office spaces for the District

Looking forward, the last bid package for Series 1 of the bond is bid out and construction is anticipated to start in the spring of 2021. Previous work in Series 1 targeted specific improvements at a variety of schools, in addition to District-wide improvements to public address systems, fire alarms, security systems as well as building monument and directional signage. For more information on the specific improvements completed at each school, please visit [fitz.k12.mi.us](http://fitz.k12.mi.us) and click on the “2019 Bond” icon to see previous “Bond Update” volumes for Series 1.
